18-3-1

MACRO-SORB
— TECHNOLOGIES LLC —

NET CONTENTS 1 GAL, 41 FL OZ (5 LITERS)
NET WEIGHT 13.23 LB (6.0 KG)

THIS CONTAINER TREATS UP TO 1.29 ACRES

QUELANT® Amino-GREEN™ 18-3-1

Quelant Amino-Green is recommended to be used as a fertilizer to supplement readily available nitrogen, phosphorous, and potassium.

RATE:

Apply 3–4 oz. per 1,000 sq. ft. every 14 days.

In cases of nitrogen deficiency, apply 5–6 oz. per 1000 sq. ft.

Store in original container in a cool, dry area. Keep out of the reach of children. Apply as directed.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/turf, and rinse any product that lands on the driveway, sidewalk or street back onto the lawn/turf.

Quelant Amino-Green is tank mix compatible with most soluble fertilizers, insecticides, herbicides, fungicides or plant growth regulators. If you are unsure of the compatibility of your specific tank mix, conducting a standard jar test prior to mixing is recommended.

This product is intended as a supplement to a regular fertilization program and may not, by itself, provide all the nutrients normally required by plants. A lawn will typically utilize 1 to 4 lbs. of nitrogen per 1000 sq. ft. per growing season. When used as directed, this product will supplement your regular fertilizer program by providing 0.042 to 0.085 lbs. of nitrogen per 1000 sq. ft. Consult your local extension office for questions regarding a regular fertilization program.

This fertilizer contains phosphorus and may not be used on turf in the state of Maryland except when 1) providing nutrients to specific soils and target vegetation as determined to be necessary in accordance with a soil test that was conducted by a laboratory identified under §8-803.7 of the Agriculture Article, Annotated Code of Maryland, performed no more than 3 years before the application; 2) establishing vegetation for the first time, such as after land disturbance, provided the application is conducted in accordance with the recommended application rates established by the State; or 3) reestablishing or repairing a turf area. In Virginia this lawn/turf contains phosphorous and is only for nonagricultural use on (1) turf during its first growing season, (2) on turf areas being repaired or renovated, and (3) on turf where a soil test performed within the last 3 years indicates a phosphorous deficiency. This fertilizer is not for the routine maintenance of turf.

Limited Warranty: Seller offers for sale the product Quelant Amino-Green. There are no warranties of merchantability of fitness for a particular purpose which extend beyond the description of the product in this label and liability of Seller is limited to replacement of any product which does not meet these specifications. Suggestions for use and information on results obtained with its use are assumed by the manufacturer to be reliable. Since conditions of use are outside the control of Seller, the buyer is responsible for all results, including injury and damage stemming from the use of this product alone or in combination with other materials.

Information concerning the raw materials composing this product can be obtained by writing to the Guarantor listed on this label and referring to the batch number found on this container.
