QUELANT®-Minors 2-0-0

Quelant-Minors is a proprietary blend of nitrogen derived, in part, from protein hydrolyzed to its constituent amino acids - and micronutrients formulated to be applied as a foliar spray or through fertigation to prevent or correct micronutrient deficiencies of turfgrass and other plants.

RATE: Apply 1-1.5 oz. per 1,000 sq. ft. every 14-28 days throughout the growing season.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/turf, and rinse any product that lands on the driveway, sidewalk or street back onto the lawn/turf.

Quelant-Minors is tank mix compatible with most soluble fertilizers, insecticides, herbicides, fungicides or plant growth regulators. If you are unsure of the compatibility of your specific tank mix, conducting a standard jar test prior to mixing is recommended.

This product is intended as a supplement to a regular fertilization program and may not, by itself, provide all the nutrients normally required by plants. A lawn will typically utilize 1 to 4 lbs. of nitrogen per 1000 sq. ft. per growing season. When used as directed, this product will supplement your regular fertilizer program by providing 0.0017 to 0.0025 lbs. of nitrogen per 1000 sq. ft. Consult your local extension office for questions regarding a regular fertilization program.

CAUTION: Contains boron. Boron is recommended for all crops where boron may be deficient; however, excessive application to susceptible crops may cause damage. Contains molybdenum. Do not eat, feed to animals, or apply to land used for grazing ruminant animals. Wash hands thoroughly with soap and water after handling and before eating or smoking.

Limited Warranty: Seller offers for sale the product Quelant-Minors. There are no warranties of merchantability of fitness for a particular purpose which extend beyond the description of the product in this label and liability of Seller is limited to replacement of any product which does not meet these specifications. Suggestions for use and information on results obtained with its use are assumed by the manufacturer to be reliable. Since conditions of use are outside the control of Seller, the buyer is responsible for all results, including injury and damage stemming from the use of this product alone or in combination with other materials.

Information concerning the raw materials composing this product can be obtained by writing to the Guarantor listed on this label and referring to the batch number found on this container. Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>
